## IAT's integrated PLC System

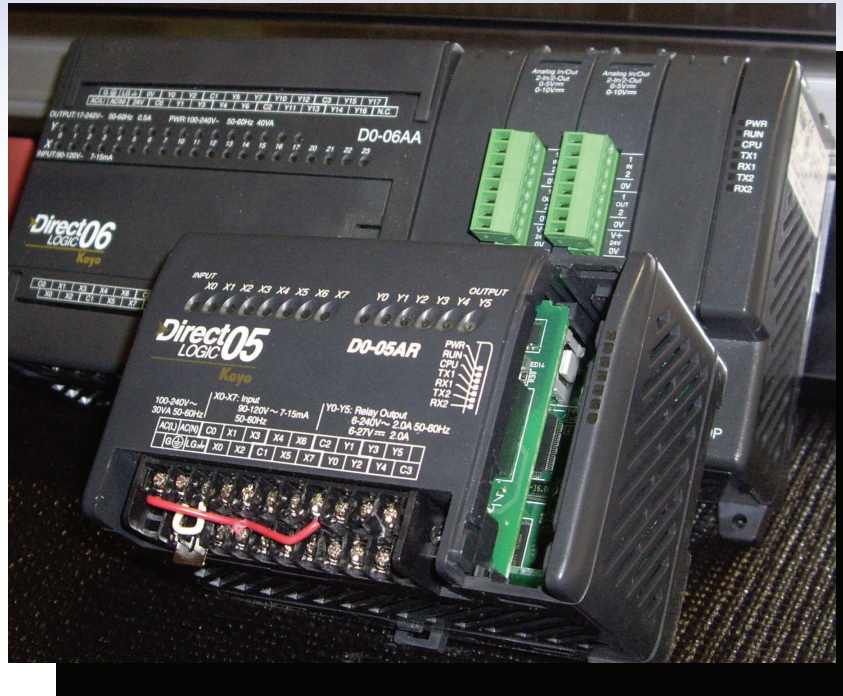

Data Logging for long term analysis

Powerful Computing

Multiple touch screen options

Our custom iControl PLC system can be custom designed specifically for your company's control and monitoring needs.

iControl is designed and built to give you all the information there is to know about your desiccant dehumidification system. Whether it's remote access control, touch screen integration or data logging you're concerned about, IAT's iControl will exceed your PLC expectations.

We offer a number of different options to cater to you. Some of them are:

- Multiple I/O options
- Screen sizes from 6" up to 15"
- Remote data acquisition system
- Data logging capabilities
- Easy Ladder Logic programming

Call us today to discuss what we can offer for your PLC needs.
