

About IAT

Since the inception of Innovative Air Technologies in 2001, we've desired to change the status quo when it comes to low humidity systems. Our vision is to enrich the lives of all who we encounter: customers, vendors, employees, all.

That's IAT!

This drives us to innovate with our products and offer an industry-leading customer service experience from planning to implementation and beyond.

Job Title: Testing & QC

What we are looking for in a Team member:

We are looking for a Testing & QC Technician to join our production team and ensure every unit leaving IAT meets our highest standards of performance, safety, and reliability. This position is key to protecting our reputation and customer satisfaction. The right person will be highly skilled in troubleshooting, innovative in problem-solving, and detail-oriented in inspections and testing.

This role works to validate unit performance, resolve issues, and recommend improvements that strengthen future builds. We are looking for someone positive, self-motivated, and excited about quality, innovation, and making a lasting impact.

Primary Responsibilities

- Perform testing and inspections of dehumidification units to ensure they meet engineering specifications, IAT protocols, and safety standards.
- Diagnose and troubleshoot issues with mechanical, electrical, refrigeration, or control systems during testing.
- Inspect workmanship, wiring, piping, sealing, and overall product quality before release.
- Document test results, inspection findings, and corrective actions clearly and accurately.
- Collaborate with Production and Engineering to resolve issues and improve manufacturability.
- Provide feedback and insights to prevent recurrence of issues and strengthen future designs.
- Support Field Service and Customer teams with technical knowledge when needed.
- Promote a safe, clean, and organized work environment that reflects IAT's standards.

Basic Qualifications

- High School Diploma or GED
- Experience in manufacturing or Testing/QC role
- Strong troubleshooting and diagnostic skills with the ability to innovate solutions.
- Ability to read and interpret engineering drawings, electrical schematics, and technical documents.

- Excellent documentation and communication skills.
- Proven ability to solve problems quickly and effectively.
- Positive, motivated, and detail-oriented personality.

Job Type: Full-time

Experience: 3+ years

Benefits: 401K, Health Plan, 4-Day Work Week, Bonuses, Monthly Lunches, and Company Sponsored Team-building Events.

Hours: 4 Day work week - 6AM to 5PM Monday – Thursday. Some overtime as needed
